Accepting the challenge

Diesel Electrical Equipment, Inc. understands the need for a qualified and reliable vendor when servicing your locomotive electrical components.

Committed to the needs of our customers, Diesel Electrical Equipment, Inc. has proven with over 20 years in the industry that customer support is the key essential to success.

Assisting our customers in managing their largest design, rebuild and maintenance projects down to that occasional component that requires servicing is what we can provide. If a need extends beyond your scope, we also offer technical support and onsite consulting services.

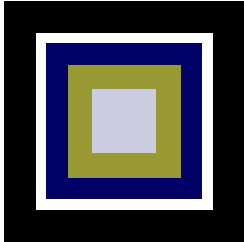

Meeting the need

Our skilled staff not only provides the servicing of electrical components for most styles of locomotives, we also unit exchange and supply both new and remanufactured units outright.

In today's time critical business environment, Diesel Electrical Equipment, Inc. not only realizes the need to service equipment in a timely manner but also the importance of supplying material and equipment to complete a variety of maintenance needs all initiating from one key source. We welcome inquiries no matter what type of locomotive material and components you are seeking.

If your fleet consists of a variety of models and generations of locomotives, Diesel Electrical Equipment, Inc. prides itself in providing material and services often difficult to procure through other sources. Our stock consists of a multiplicity of material used in locomotives manufactured mid-century to the newest high powered and eco-friendly units.

Supporting our customers

Offering not only competitively priced services, our goal at Diesel Electrical Equipment, Inc. is to offer our customers the reliability they demand. All of our products are serviced to the smallest sub-component using new material in the repair process. The workmanship stands alone in providing customers the longevity they require from their equipment.
